

SEND YOUR DRAWING INTO SPACE

Swiss experts are developing and building the CHEOPS telescope. It will be launched at the end of 2017 and will look from Earth's orbit at planets in other solar systems. The satellite will carry a special plate on which 3000 children drawings will be engraved.

Are you between 8 and 14 years old and would you like your drawing to fly with CHEOPS into space? Under www.cheops.unibe.ch you will find where and how you can participate.
